Safe Touch Technology

**OUR SAFE TOUCH TECHNOLOGY
KEEPS THE EXTERIOR OF THE
SHOWER VALVE COOL TO THE
TOUCH.**

Bristan have introduced clever features such as Safe Touch Technology to many of our bar showers to ensure family safe showering and reduce the risk of scalding when showering.

This technology works within the valve body itself. The hot water runs through the centre of the valve and the mixed water surrounds this to ensure that the outer temperature of the valve is always Safe to the Touch. This guarantees that the shower is safe for the whole family.

Wallmount 10

WALLMOUNT 10 is a fast-fixing kit that makes it faster to fit, maintain or replace a bar shower by enabling a rigid fixing of an exposed bar shower valves to 15mm pipework.

It is compatible on all bar showers with 15mm inlet connections and has a brass base construction for a secure fixing to the wall.

Wallmount 12

With two front-facing isolation valves, you can quickly and easily isolate the water supply at the point of installation, instead of having to switch it off at the mains. This makes it ideal for new bathrooms where you want to connect a water supply at first fix but install the shower later on so there's no risk of damage to the shower.

1. Innovative rubber seal within the WALLMOUNT 12, reduces the risk of water ingress back into the cavity.

2. The bar shower itself needn't be fitted until a later stage of the build process, protecting it from potential on site damage.

3. Isolate the water supply on the wall with just the turn of a screw, which negates the potential for any water damage during installation.

4. Quick & easy to remove and replace a bar shower onto the WALLMOUNT 12 for retrofit and maintenance and easy to upgrade to other bar showers within the Bristan range.

A dark-colored shower fixture is mounted on a light-colored wall. The fixture includes a large square showerhead at the top, a vertical support bar with a sliding door handle, and a horizontal bar at the bottom with two knobs. The background is a dark blue gradient.
